CURRENT LIST of MEDICAL LITERATURE

vol. 6

March 31, 1944

No. 13

SUBJECT GROUPS ACCORDING TO JOURNALS

- 1. Anatomy; Histology
- 2. Anthropology; Ethnology
- 3. Archeology; Paleontology
- 4. Aviation Medicine
- 5. Bacteriology; Parasitology
- 6. Biology; Embryology
- 7. Bone; Joint; Extremities; Muscle
- 8. Cancerology
- 9. Cardiovascular System
- 10. Chemistry; Physics
- 11. Dentistry; Stomatology
- 12. Dermatology
- 13. Diagnosis; Clinical Methods
- 14. Dietetics: Foods: Nutrition
- 15. Digestive System
- .16. Endocrinology
- 17. Forensic Medicine; Toxicology
- 18. Genetics; Eugenics
- 19. Gynecology; Obstetrics
- 20. Hematology
- 21. History; Biography; Bibliography
- 22. Homeopathy; Osteopathy, etc.
- 23. Hospitals
- 24. Immunology; Serology
- 25. Industrial Hygiene; Sociology

- 26. Infectious Diseases; Epidemiology
- 27. Medicine
 - 28. Metabolism
 - 29. Military and Naval Medicine
 - 30. Miscellaneous
 - 31. Neurology; Psychiatry
 - 32. Nursing
 - 33. Ophthalmology
 - 34. Otorhinolaryngology; Phoniatry
 - 35. Pathology
 - 36. Pediatrics: Child Welfare
 - 37. Pharmacology; Pharmacy
 - 38. Physiology
 - 39. Psychology; Mental Hygiene
 - 40. Public Health; Sanitation
 - 41. Radiology; Phototherapy
 - 42. Respiratory System
 - 43. Surgery; Traumatology
 - 44. Therapeutics
 - 45. Tropical Medicine
 - 46. Tuberculosis
 - 47. Urology
 - 48. Venereal Diseases; Sexology
 - 49. Veterinary Medicine
 - 50. Zoology

The above is a reproduction of the portrait of Colonel Harold W. Jones which the "Friends of the Army Medical Library" have had painted for presentation to the Library. This was done in recognition of his contributions to the advancement of medicine, particularly that one resulting from his adoption of microfilm copying as a legitimate extention of the service rendered by the Army Medical Library to those at a distance engaged in medical research.

The service thus organized has transformed the Library from an essentially local institution to one supplying the exceptional literature needs of those engaged in medical research not only throughout our own country but in many parts of the world. The recently enlarged installation required for this Pho.oduplication Service was described in the Current List of last week.

It is expected that the formal presentation of the portrait to the Library will be made within a few weeks. The date will be announced shortly.

8. Biology; Embryology

Texas Rep. Biol. M., 1943, 1: No. 4

POTH, E. J., & ROSS, C. A. Bacteriostatic properties of sulfanilamide and some of its derivatives; phthalylsulfathiazole, new chemotherapeutic agent locally active in the gastroenteric tract. 345-70.

ANIGSTEIN, L., BADER, M. N. /ET AL./ It tigations on rickettsial diseases in Inves-Texas; spotted fever, protection of laboratory animals by intradermal inocu-lation of immune rabbit serum. 371-88.

lation of immune rabbit serum. 371-88.

As a war emergency and as an aid to medical research, this Library is now making microfilms of the periodical literature without charge. Orders from our own and the allied Armed Forces are given priority, but all others will be filled as rapidly as circumstances allow.

This Library recognizes that microfilms permit the source literature in its possession to be more conveniently, economically, and widely placed at the disposal of those engaged in medical research than has ever been possible hitherto. This activity is considered as a legitimate extension to persons at a distance, of the service previously rendered without any charge to those who were able to come to the Library. It thus permits fulfilling more completely the purpose for which the Library exists, namely the diffusion and promotion of medical knowledge.

Since microfilm copying is being done by this Library to promote medical research in its broadest aspects, orders may be sent direct by individuals or through the librarians of hospitals, medical schools, and other institutions located in this country or elsewhere. In general, only the separate articles in the periodical literature will be copied. Long-run copying may be done in special cases but will be subject to such modifications as the facilities of the Library and the present restricted supply of film dictate.

In order to simplify the operation of the copying service, the use of order blanks will no longer be required. Titles and references to articles of which microfilm copies are desired should be written on letter paper and a carbon copy of each request should be included.

Governmental establishments and members of the armed forces need not include postage where films are requested. In the case of all others, this service, like interlibrary loans, is not granted the franking privilege, and postage in the following amounts should be sent -

For articles not exceeding 100 pages, send life For articles not exceeding 400 pages, send 3¢ For articles over 400 pages, send 4t¢ stamps
